Description

North Force is made in Maine to the highest build standards. The trailers are not the cheaply made trailers found at the big box stores. They come with a highly durable paint which is applied only after the frame is blasted to ensure adhesion (a very common problem with big box trailers). They have LED lights which meet both US and Canadian standards. They are built with Dexter 2000 pound axles. The decking is sourced right in Readfield and is stained to ensure it withstands the test of time. The wheels are a 12 inch wheel and are able to handle the load with ease. The electrical connector is a 7 pin connector and all the electrical is secured into the frame of the trailer to protect from damage. They come complete with a trailer jack, solid sides, and a removal rear gate.

There is a lot of pride that goes into making a trailer at North Force - something we expect from a Maine company, employing Maine people.
